Summer fun in the sun

The hot weather is here, the bugs are out and show season is in full swing. It's summer time!

Potomac and Flu/Rhino Boosters

It is time to booster for Potomac Horse Fever. We have treated horses already and we expect to see cases through the fall. Our recent wet, hot and humid weather is prime for disease. Flu/Rhino should be boosted if your horse will be coming into contact with other horses. Both vaccines can be administered at the same time.

Booster Vaccine Days

We are holding booster days at the clinic just as we did the vaccine days this spring. Haul in to get your boosters at a **discounted rate!** Please let us know if you plan to attend.

July 3rd- 8 am-9 am

July 31st- 8 am-10 am

August 21st- 8 am-10 am

Can you gather **10 or more** horses at one location? If so, we can offer boosters for a discounted rate. Call us to schedule a Farm Day!

We will also hold **area days**. Do you have some neighbors who also have horses? Set up a day with them, and we can give all of you a break on the farm call. The more people we can get in a close area the better the deal!

Bug Season Tips

You can help prevent disease by simply controlling the bug population.

- Eliminate stagnant water around the barn
- Turn lights off at night to keep bugs away
- Keep stalls and run-ins clean
- Keep pastures mowed and tall weeds down
- Keep manure piles far away from barn
- Good ventilation and air flow in the barn

Happenings

Richland Park- Come out to watch the Olympic eventing riders at the [Richland Park Horse Trials](#) August 26-29th. We are providing the veterinary services for the 5th consecutive year! Visit our informational booth while you're there.

Dental Days- We are holding specific days in the clinic when you can receive dentals for your horses at a discounted rate. Watch for dates in the fall & winter!

Fall Seminar-Our seminar this fall focuses on equine podiatry (foot care) and features **Dr. Bryan Fraley**. Dr. Fraley is a DVM who specializes in podiatry. He has a podiatry center at Hagyard Equine Medical in Lexington, KY. The seminar will be **October 30, 2010 at 10am**. More details to come.

Winter Seminar- Our annual winter seminar will be held on February 26th, 2011. We haven't yet decided the topic. Let us know what you want to learn about!

What's New

EquiPulse - Our new Pulsed Electro-Magnetic Field Therapy machine delivers a very short duration, high intensity magnetic pulse. It treats a variety of issues, including sore backs, sore and/or arthritic joints and edema (swelling). For more information check out our [website](#).

Dr. Anderson has left our clinic to work in Ann Arbor at a small animal clinic. She needed to move to be closer to her husband's job. We are sad to see her go, but respect her decision to do what is right for her family.
