

Beadle Lake Large Animal Clinic

Vet Gazette

March 2010

Believe it or not....
It's Spring!

It's time to think about vaccinations, Coggins, deworming, spring tune-ups & breeding.

Vaccination & Coggins Days

Trailer your horse to **our clinic** for the **best prices** on vaccines and coggins on the following days:

March 27	11AM to 1PM
April 10	8AM to 11AM
May 15	8AM to 10AM

Take advantage of our special days and receive a brief **physical exam by the veterinarian** for your horse as well as **½ price fecal exams**. Please let us know if you plan on attending one of these days.

Can you gather **10 or more** horses at one location? If so, we can offer vaccines and coggins for the same prices as the clinic days. Call us to schedule a Farm Day!

Recommended Spring Shots

To give your horse the best chance of staying healthy all year, we recommend the following vaccinations: **Eastern & Western Encephalomyelitis, Tetanus, West Nile, Flu, Rhino, Potomac Horse Fever and Rabies.**

Wellness Program 2010

Sign Up Now! Deadline Extended!
3/15/10

We are happy to be bringing our wellness program back for a second year. It covers all of the routine care a horse needs for a year at a discounted rate. See our [website](#) for further details.

Performance Exams

Is your horse ready for the performance season? Dr. Emery's performance exam will make sure your horse is in winning form. A performance exam includes a lameness evaluation, chiropractic and acupuncture. Make an appointment today!

Breeding Season

Are you thinking about breeding your mare this year? Dr. Van Lente is our resident **equine reproduction specialist** and has completed several courses in reproduction and advanced reproductive techniques. He is willing to consult with you about your horse to develop a successful breeding program tailored to your individual needs. The services he provides are ultrasounding, uterine cultures & biopsies, artificial insemination, embryo transfer and stallion collection. Please contact us for any questions.

What's New?

Dr. Anderson recently completed the International Hoof Summit. She is excited to work with you and your farrier to improve your horse's hoof health.

Check out the new addition on the back of our clinic. It allows us to watch horses move in inclement weather and provides a place for farriers to work.

Become a fan of us on [Facebook](#)! We already have almost 150 fans!

Online Pharmacy- Remember to check out our online pharmacy for competitive prices on many products!

Order vaccines online- Prices meet or beat catalogs.

Disease Watch Strangles

We have seen several cases of Strangles this winter. Show season will only increase the spread of the disease since Strangles is extremely contagious. We recommend vaccinating horses that will have contact with outside horses. Also, quarantining any new horses for 2-4 weeks is recommended.
